## 2D plans

Our 2D plans turn your measurements into a well thought out working area to suit your particular requirements. Once your furniture plan is complete, we can be as detailed as you need and display network points, lighting, heating, power, and anything else you may require. Want to hang on to a few things? Our 2D plans can show a mix of old and new furniture designed by our experienced team.

We recommend that your final fabric selection is made based on a physical swatch only and use printed swatches merely as a guide. Please contact our Sales Team to find out more.

## Fire safety

The fire retardancy or CRIB rating of a particular fabric measures its ability to resist ignition from an exposed flame. There are a variety of tests for the flammability of upholstery fabrics within the UK. We have listed a brief description of those applicable to our market below (please note this is not exhaustive and contact us if you need more information).

### Low Hazard

Tested to BS7176:2007, low hazard fabric ratings are suitable for use within the general office environment.

### CRIB 5

Indicates a fabric has been treated and tested to be suitable for most purposes, particularly contract environments like hotels, where the impact of a fire can be especially dangerous due to the volume of people.

### CRIB 7

This is a more stringent test version of CRIB 5. Fabric that passes this test is suitable for more hazardous environments like prisons or offshore installations.

## Material standards

All the materials used in our furniture, seating and storage ranges are carefully selected and specified to our ISO 9001 certification. We work with globally renowned manufacturers to ensure we can bring to market quality products that stand the test of time and offer an exceptional value proposition.

### Wooden furniture

Our desktops and wooden storage units are made from Forest Stewardship Council (FSC) certified Melamine Faced Chipboard (MFC).
